Working Scientifically – Statutory Requirements for Y5/6

During years 5 and 6, pupils should be taught to use the following practical scientific methods, processes and skills through the teaching of the programme of study content:

- planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary
- taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate
- recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs
- using test results to make predictions to set up further comparative and fair tests
- reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations
- identifying scientific evidence that has been used to support or refute ideas or arguments.

Year 5	Y5 Properties and changes of materials	(Sound)	Y5 Earth and Space Describe the movement of the Earth, and other planets, relative to the	Y5 Forces □ Identify the effects of air resistance,	Y5 Animals including humans Describe the changes as	Y5 Living things and their habitats Describe the differences in the
---------------	---	---------	---	---	---	---

	<ul style="list-style-type: none"> □ Compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets □ know that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution □ use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating □ give reasons, 		<p>Sun in the solar system</p> <ul style="list-style-type: none"> □ describe the movement of the Moon relative to the Earth □ describe the Sun, Earth and Moon as approximately spherical bodies □ use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky. 	<p>water resistance and friction, that act between moving surfaces</p> <ul style="list-style-type: none"> □ Recognise that some mechanisms, including levers, pulleys and gears, allow a smaller force to have a greater effect. <p>Explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object</p>	<p>humans develop to old age.</p>	<p>life cycles of a mammal, an amphibian, an insect and a bird</p> <ul style="list-style-type: none"> □ describe the life process of reproduction in some plants and animals.
--	---	--	--	--	-----------------------------------	--

	<p>based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic</p> <ul style="list-style-type: none"> □ demonstrate that dissolving, mixing and changes of state are reversible changes □ explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the action of acid on bicarbonate of soda. 					
Year 4	Y4 Living things and their habitats (classification)	Y4 Animals including humans describe the	Y4 States of matter compare and group materials together,	Y4 Sound □ identify how sounds are	Y4 Electricity □ identify common	

	<p>recognise that living things can be grouped in a variety of ways</p> <ul style="list-style-type: none"> □ explore and use classification keys to help group, identify and name a variety of living things in their local and wider environment □ recognise that environments can change and that this can sometimes pose dangers to living things. 	<p>simple functions of the basic parts of the digestive system in humans</p> <ul style="list-style-type: none"> □ identify the different types of teeth in humans and their simple functions □ construct and interpret a variety of food chains, identifying producers, predators and prey. 	<p>according to whether they are solids, liquids or gases</p> <ul style="list-style-type: none"> □ observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius ($^{\circ}\text{C}$) □ identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature. 	<p>made, associating some of them with something vibrating</p> <ul style="list-style-type: none"> □ recognise that vibrations from sounds travel through a medium to the ear □ find patterns between the pitch of a sound and features of the object that produced it □ find patterns between the volume of a sound and the strength of the vibrations that produced it □ recognise that sounds get fainter as the distance from the sound source increases. 	<p>appliances that run on electricity</p> <ul style="list-style-type: none"> □ construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers □ identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery □ recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit □ recognise some common

Working Scientifically - Statutory Requirements Y3/4

During years 3 and 4, pupils should be taught to use the following practical scientific methods, processes and skills through the teaching of the programme of study content:

- asking relevant questions and using different types of scientific enquiries to answer them
- setting up simple practical enquiries, comparative and fair tests
- making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers
- gathering, recording, classifying and presenting data in a variety of ways to help in answering questions
- recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables
- reporting on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions
- using results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions
- identifying differences, similarities or changes related to simple scientific ideas and processes
- using straightforward scientific evidence to answer questions or to support their findings.

Year 3	Y3 Animals including humans □ identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition	Y3 Magnetism □ compare how things move on different surfaces □ notice that some forces need contact between two objects, but magnetic forces	Y3 Rocks, fossils and soils. □ compare and group together different kinds of rocks on the basis of their appearance and simple physical properties <ul style="list-style-type: none"> ▪ □ describe in simple terms how fossils 	Y3 Light and shadows □ recognise that they need light in order to see things and that dark is the absence of light □ notice that light is reflected from	Y3 Plants □ identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers □ explore the	-
---------------	---	---	---	---	--	---

	<p>from what they eat</p> <ul style="list-style-type: none"> □ identify that humans and some other animals have skeletons and muscles for support, protection and movement. 	<p>can act at a distance</p> <ul style="list-style-type: none"> □ observe how magnets attract or repel each other and attract some materials and not others □ compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials □ describe magnets as having two poles □ predict whether two magnets will attract or repel each other, depending on which poles are facing. 	<p>are formed when things that have lived are trapped within rock</p> <ul style="list-style-type: none"> □ recognise that soils are made from rocks and organic matter. 	<p>surfaces</p> <ul style="list-style-type: none"> □ recognise that light from the sun can be dangerous and that there are ways to protect their eyes □ recognise that shadows are formed when the light from a light source is blocked by a solid object □ find patterns in the way that the size of shadows change. 	<p>requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant</p> <ul style="list-style-type: none"> □ investigate the way in which water is transported within plants □ explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal. 	
--	--	---	--	--	---	--

<p>Year 2</p>	<p>Living things and their habitats</p> <ul style="list-style-type: none"> □ explore and compare the differences between things that are living, dead, and things that have never been alive □ identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other □ identify and name a variety of plants and animals in their habitats, including micro-habitats 	<p>Everyday materials -and their uses</p> <p>Shaping materials</p> <ul style="list-style-type: none"> □ identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses □ find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching. 	<p>Animals and humans. Exercise, nutrition, reproduction</p> <ul style="list-style-type: none"> □ notice that animals, including humans, have offspring which grow into adults □ find out about and describe the basic needs of animals, including humans, for survival (water, food and air) □ describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene. 	<p>-</p>	<p>Plants</p> <p>Seeds, bulbs, and plants</p> <ul style="list-style-type: none"> □ observe and describe how seeds and bulbs grow into mature plants □ find out and describe how plants need water, light and a suitable temperature to grow and stay healthy. 	<p>-</p>

	<ul style="list-style-type: none"> □ describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food. 					
--	---	--	--	--	--	--

Working Scientifically - Statutory Requirements Y1/2

During years 1 and 2, pupils should be taught to use the following practical scientific methods, processes and skills through the teaching of the programme of study content:

- asking simple questions and recognising that they can be answered in different ways
- observing closely, using simple equipment
- performing simple tests
- identifying and classifying
- using their observations and ideas to suggest answers to questions
- gathering and recording data to help in answering questions.

Year 1	<p>Animals Identify and name some common animals. Know their structure. Know main human body parts.</p> <ul style="list-style-type: none"> □ identify and name a variety of 	<p>Everyday materials</p> <ul style="list-style-type: none"> □ distinguish between an object and the material from which it is made □ identify and name a variety 	<p>Plants Including common flowers and trees and their basic structure</p> <ul style="list-style-type: none"> □ identify and name a variety of common wild and garden plants, including deciduous and evergreen trees 	<p>Seasonal changes</p> <ul style="list-style-type: none"> □ observe changes across the four seasons □ observe and describe weather 		
---------------	---	--	---	--	--	--

	<p>common animals including fish, amphibians, reptiles, birds and mammals</p> <ul style="list-style-type: none"> □ identify and name a variety of common animals that are carnivores, herbivores and omnivores □ describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals, including pets) □ identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense. 	<p>of everyday materials, including wood, plastic, glass, metal, water, and rock</p> <ul style="list-style-type: none"> □ describe the simple physical properties of a variety of everyday materials □ compare and group together a variety of everyday materials on the basis of their simple physical properties. 	<ul style="list-style-type: none"> □ identify and describe the basic structure of a variety of common flowering plants, including trees. 	<p>associated with the seasons and how day length varies.</p>		
--	--	---	---	---	--	--

Reception From understanding of the world ELG	Children to know about similarities and differences in relation to places, objects, materials and living things. They can talk about the features of their own immediate environment and how environments might vary from one another. They will make observations of animals and plants and explain why some things occur, and talk about changes.					

Curriculum compiled by:
 Scott Macmillan, Deputy Head Teacher and Subject Leader

*The content above must be taught. However, there is some flexibility between Y1/2, Y3/4 and Y5/6 topics and when they are taught. If changes are made please notify the subject leader. Further useful information can be found in the non statutory guidance in the National Curriculum document.
